Professional Summary

Technically proficient and data-aware professional with a Bachelor of Computer Applications, possessing a proven ability to leverage web development expertise for business impact, including enhancing user accessibility, driving engagement, and improving sales operations for an e-commerce platform. Experienced in building high-performance Progressive Web Apps, engineering scalable data models, and optimizing application reliability. Eager to apply an analytical and user-centric approach to a Founding Growth Marketer role, translating technical insights into growth strategies.

Core Skills

- Data & Analytics: Data Modeling, Advanced Excel, Data Validation
- Web Technologies: Progressive Web Apps (PWA), Web Deployment, Service Workers, Next.js, React, JavaScript, TypeScript, WebSockets
- Databases & Tools: Prisma, Git, GitHub, T3 Stack

Professional Experience

Software Development Intern | CODTECH | Bengaluru, India

- Led the design and deployment of a mobile-first Progressive Web App (PWA) for a high-traffic e-commerce platform, directly impacting user reach and accessibility.
- Enhanced user experience and application performance through implementing Service Workers for optimized asset caching and offline capabilities, contributing to improved user retention.
- Engineered scalable relational data models to efficiently manage complex product hierarchies, providing a robust foundation for data-driven insights.
- Ensured seamless user interactions and reliability by synchronizing dynamic UIs with reliable backend state transitions, contributing to a positive user journey.
- Significantly boosted user accessibility and engagement across the platform.
- Increased application reliability and performance by 30%, directly impacting user satisfaction and retention.

Projects

HI BUN Cafe System

- Developed a comprehensive full-stack business solution for HI BUN Cafe, featuring a dynamic digital storefront.
- Successfully enhanced brand presence and improved sales operations through integrated digital capabilities.
- Automated inventory tracking, optimizing operational efficiency and enabling a focus on customer experience.

Collaborative Editor

- Developed a real-time collaborative editor using JavaScript and WebSockets, ensuring seamless data integrity across concurrent multi-user sessions for enhanced user interaction.
- Focused on efficient state management to deliver a responsive and reliable user experience, critical for engagement.

AI Development Workspace

- Engineered an AI Development Workspace focusing on robust modular architecture and strict typing (TypeScript) to create a stable user environment.
- Achieved a 25% reduction in runtime errors, enhancing platform reliability and user confidence in a

development tool.

Utility & Tracking Apps

- Created utility and tracking applications that automated fiscal utility calculations and academic scheduling with robust data validation.
- Successfully reduced manual entry time and improved data accuracy, streamlining user workflows.

Education

Bachelor of Computer Applications (BCA) | Smt. Danamma Channabasavaiah College, Bengaluru North University

Specialization: Software Development, Computer Applications, and Data Analysis | Expected Graduation: 2027
